

Magnetic Tool Holder

USER QUICK GUIDE

Introduction

This magnetic tool holder is designed to allow someone to place a mouthstick (or another tool) on the holder and then retrieve it whenever they need it again.

Features

Usage

To use, insert three neodymium magnets in the slots on the back of the tool holder and cover them with the magnet cover. Insert the tool holder in a phone mount. At this point, any magnetic item under the weight of a pair of scissors can be placed against the holder and have it stay in place.

Paperclips or other small magnetic items can be attached to non-magnetic items to the holder.

Compatibility

This toolholder will hold any magnetic item under the weight of a pair of scissors, and is mounted on a standard phone holder.
